

# Building Efficiency Accelerator

## GLOBAL ENERGY EFFICIENCY ACCELERATOR PLATFORM

# Standards to Achieve City Sustainability

April 26, 2017

Start: 16:02 CEST / 10:02 EDT

WORLD  
RESOURCES  
INSTITUTE

COPENHAGEN CENTRE  
ON ENERGY EFFICIENCY  
SEforALL EE HUB

WORLD  
GREEN  
BUILDING  
COUNCIL

# Copenhagen Centre on Energy Efficiency

- is a research and advisory institution dedicated to accelerating the uptake of energy efficiency policies, programmes and actions globally
- serves as **Sustainable Energy for All** (SEforAll's) **Energy Efficiency Hub** and supports doubling the global rate of energy efficiency improvement by 2030

## Key Focus Areas

Assisting policy change  
in countries and cities

Accelerating action  
through innovative  
delivery models

Raising the profile of  
Energy Efficiency

**Debbie Weyl** is the Manager, Building Efficiency with the WRI Ross Center for Sustainable Cities. She manages the Building Efficiency Accelerator, a global partnership to accelerate building energy efficiency in cities around the world. Prior to WRI, Debbie worked for 5 years at CLASP to improve globally the environmental and energy performance of appliances, lighting and equipment, and for 2 years at the U.S. Department of Energy on energy efficiency programs in the United States.

**Dr. Wee Kean Fong:** Senior Associate and Global Lead for TRAC City Project under the Global Climate Program and WRI Ross Center for Sustainable Cities at World Resources Institute that promotes data-driven city climate actions. TRAC City supports cities to set ambitious and measurable greenhouse gas reduction targets, plan and implement transformative actions to reduce emissions, and measure greenhouse gas performance consistently and transparently using standardized methodologies.

**Carley Chavara** is a Research Analyst with the Global Climate Program. She supports cities in tracking and reducing greenhouse gas emissions through publication development, e-learning, and application of the GHG Protocol for Cities (GPC). Carley also works with the Building Efficiency Accelerator to conduct emissions assessments of policies and projects and draft publications.

The Copenhagen Centre's Knowledge Management System (KMS) engages stakeholders in energy efficiency initiatives through knowledge sharing and outreach. The KMS provides users with access to selected information, reports, publications, and databases on energy efficiency. The KMS is linked to many other energy efficiency initiatives.
